

AMIR KHAN

Senior Full Stack Developer (MERN Stack)

-  Riyadh, Riyadh, 09848, Saudi Arabia
-  +966 570920737
-  amiraup17@gmail.com

+ EDUCATION

- The University of Agriculture
Peshawar
Peshawar
2020
BACHELOR OF SCIENCE

+ SKILLS

- React Hooks, Context API, Redux / Zustand
- Responsive design & cross-browser compatibility
- Authentication & Authorization (JWT)
- Error handling & validation (Joi, express-validator)
- MongoDB Atlas, MySQL & PostgreSQL
- Performance optimization & caching (Redis, compression)
- Google Cloud / Google Apigee
- Jest, Playwright & Postman
- JavaScript, TypeScript, es6
- Bootstrap, MUI, & Tailwind
- Axios/Fetch for API calls
- Git for version control
- File uploads (Multer)
- Restful API creation
- Ant Design & sass
- HTML & CSS
- Next js
- Unit Testing
- CI/CD
- Debugging
- Vue JS
- Angular JS
- Agile
- Node JS
- React js

+ LANGUAGES

- English
- Urdu
- Arabic

+ TOOLS

-
- Visual Studio Code (VS Code)

• GitHub/GitLab

• npm

• MongoDB Compass

• Postman

• React Developer Tools

• Jira

• Figma

• Docker

+ ABOUT ME

Experienced MERN Stack Developer with over 5 years of expertise in building responsive, user-friendly, and full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Strong focus on UI/UX best practices, delivering optimized, scalable, and maintainable code. Brings solid Quality Assurance experience, ensuring robust performance and high-quality deliverables through both manual and automated testing. Passionate about creating seamless digital experiences by combining thoughtful design, clean code, and thorough testing. Experienced in collaborative team environments, producing impactful, leading-edge websites that engage customers and drive business results, while remaining well-versed in design standards and user preferences.

+ WORK EXPERIENCE

- Technology Rivers
Islamabad
FULL STACK WEB DEVELOPER

MAR 2022 - OCT 2025

•

Designed and implemented intuitive, responsive user interfaces using React.js to enhance user experience across web and mobile platforms

•

Collaborated with cross-functional teams to troubleshoot issues, apply best development practices, and deliver scalable full-stack solutions using the MERN stack (MongoDB, Express.js, React.js, Node.js)

•

Planned and developed reusable UI components and admin dashboards to streamline application management and improve usability for end-users

•

Developed and maintained software for desktop and mobile platforms, ensuring cross-device compatibility, responsiveness, and performance

•

Applied advanced React state management techniques (Context API, Redux, etc.) to optimize rendering performance across complex component trees

•

Refactored and modernized legacy codebases to align with current development standards, improving maintainability and overall application performance

•

Built reusable components, hooks, and utility functions to accelerate development cycles and maintain consistency across the codebase

•

Performed manual and automated QA testing, including functional, regression, and performance tests, to ensure application reliability and stability

•

Integrated testing frameworks such as Jest to validate frontend and backend logic, improving product quality and reducing production bugs

•

Partnered closely with designers to uphold design accuracy, ensure proper implementation of UI/UX specifications, and contribute to a seamless user experience
- AppLab
Doha
FRONT END DEVELOPER

FEB 2020 - MAR 2022

•

Developed front-end web interfaces using React.js, Material UI, Tailwind CSS and other CSS frameworks to deliver modern, scalable user experiences

•

Implemented responsive design techniques to optimize layouts and content across desktop, mobile and tablet devices

•

Designed and updated page layouts aligned with usability best practices and performance requirements to improve user experience and maintainability

•

Collaborated on styling and component structure to ensure visual consistency, design coherence and clean, maintainable front-end code

•

Used Git and pull request workflows for version control, code reviews and collaborative development within the team

•

Participated in agile ceremonies, contributing to sprint planning, estimation and continuous improvement of front-end delivery

•

Optimized front-end performance through techniques such as bundle size reduction, lazy loading and code splitting to improve load times and responsiveness

•

Implemented component-based user interfaces with React, Vue or Angular following front-end best practices, patterns and reusability principles
